Weekly Coal Production

Production for Week Ended: March 19, 1988

Summary

U.S. coal production in the week ended March 19, 1988, as estimated by the Energy Information Administration, totaled 18.9 million short tons (bituminous coal and lignite, nearly 18.9 million short tons; Pennsylvania anthracite, .08 million short tons). This was 4.8 percent higher than production in the previous week, and was 5.8 percent higher than production in the corresponding week of 1987.

Cumulative data in Table 1 are presented for the 52-week period ended in the current week. Data for the 52-week period ended in the corresponding week one year earlier are also included.

The methodology used to make weekly estimates of coal production was published in the Weekly Coal Production (DOE/EIA-0218(86/35)), released for publication on September 8, 1986.

Figure 1. Coal Production

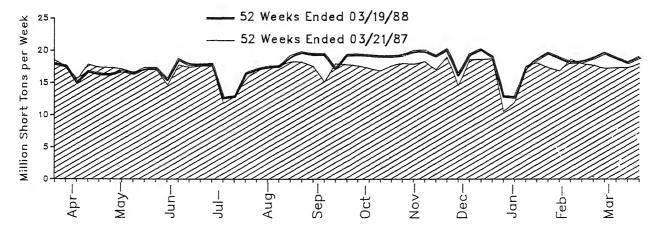

Table 1. Coal Production

Production and Carloadings	Week Ended			52 Weeks Ended		
	03/19/88	03/12/88	03/21/87	03/19/88	03/21/87	Percent Change
Production (Thousand Short Tons)		: *				
Bituminous ¹ and Lignite	18,859	17,985	17,824	919,597	877,093	4.8
Pennsylvania Anthracite	75	76	73	4,273	4,224	1.2
II C Total	18,934	18,062	17,897	923,870	881,317	4.8
U.S. Total						

¹Includes subbituminous coal.

Notes: 1987 and 1988 data are preliminary. Total may not equal sum of components because of independent rounding. Sources: Association of American Railroads, Transportation Division, Weekly Statement CS-54A; Energy Information Administration, Form EIA-6, "Coal Distribution Report" and State mining agency coal production reports.
